

Frame Out Recessed

TEST

TYPE
PROJECT

Overview

- "Frame Out" exit sign has been developed specifically for architects, engineers and lighting designers. It's available in anodized aluminum, wood grain, custom RAL finishes to match the architecture and design of interior spaces.
- Recessed "Frame Out" trim and trim-less flange have a unique regressed channel that creates the illusion of the exit frame to be floating in the ceiling. in sheetrock or grid installation.
- Options are now limitless in designing exit signs into architectural spaces.
- North America/ Europe Patent Pending
- Easily accessible test switch and charge rate indicator.
- Optional 6-inch or 8-inch lettering with removable directional arrows in red or green.
- Listed for damp location
- Removable front cover for easy installation.
- Field Installable arrows for left, right or both directions.
- Our all-aluminum extruded housing is made in the USA and is UL 924, NEC, OSHA and NFPA 101 Life Safety Code approved.
- Dual Voltage 120v/277v AC with Long-life LED illumination and NON-CEC Compliant.
- Options are now limitless in designing exit signs into architectural spaces. 12.

Ordering Format

PART NUMBER: FOR

Mounting Style	Letter Size	LED/Letter Color	Acrylic Style	Frame Out Finish
R = Recessed	6 = 6 inch 8 = 8 inch	R = Red EXIT / 4 direction arrows included G = Green EXIT / 4 direction arrows included	FC1 = Clear - 1 side only FM1 = Mylar Mirror-1 side only FW1 = White- 1 side only FM2 = Mylar Mirror-2 side only FW2 = White- 2 side only	W = White B = Black SVR = Silver RAL = RAL Custom Color - enter RAL# in notes section PA = Plated Aluminum-enter plated finish in notes CW = Custom Wood Finish - see wood PN # enter in notes. AA = Anodized Aluminum -enter PN in notes section
Recessed Trim Style	Recessed Trim Finish	Battery	Voltage	
SF = Trimless F = Trim	W = White B = Black SVR = Silver RAL = RAL Custom Color - enter custom RAL # in notes section	BB = 4.8 Volt NiCad 90Min./24hr Charge AC = AC only 2 watts no battery	V12 = Dual 120/277 Volt-AC 4 Watts

Electrical / Driver

- Drivers - Our drivers are specifically selected based on fixture application to ensure ultimate reliability and long life. We use only UL recognized brands of LED drivers. Our LED drivers feature HPF (high power factor), universal voltage 110 - 277 VAC and include 0-10V dimming. Please note, 277v has longer distances from power feed to power feed then 120v.
- If required, we can supply premium drivers such as Lutron, Eldoled and others upon request. Advanced control systems compliant drivers such as POE, DALI, DMX, etc. are also available, please consult factory.
- Rated life (90% survivorship) of 50,000 hours at 50° C max. ambient (and 70° C max. case) temperature. At maximum driver load: Efficiency >84%, PF>0.9, THD
- POE - We are working with Molex/Igor POE systems. We can add a POE driver into our fixtures or remote them. Based on the fixture you select, we will notify you (or you can contact the factory) to see if we can install the P-driver or the P-driver needs to be remote. Just add POE1 in the spec and we will advise. Please keep in mind you need to specify a complete POE control system before specifying POE1.
- Our LED drivers feature HPF (high power factor), universal voltage 110 - 277 VAC and include 0-10V dimming.
- Emergency drivers are factory installed as an option, long life, high temperature, recyclable Ni-Cad battery pack with test switch and charge indicator. EMR is minimum of 90 minutes operation to meet code.
- Whip - Six feet long, wiring RHOS/Reach Compliant, 18 gauge, 600v rated, Specify wired to the fixture as an OPTION.

LED Performance

LED Output	CCT Color Temp	Watts	Lumens	Lumens per Watt	CCT Multiplier
<ul style="list-style-type: none"> • The table above is a quick reference. When calculating loads make sure you add direct and indirect LPW to get total wattage. Please refer to photometric report for detailed information. • Our light engines are precisely designed for optimal operation of LED assemblies. • Our standard LED's CCT (correlated color temperature) range is 2700K to 4000K. Other CCT values are available upon request. • We log LED bin codes for each project we supply to ensure color consistency and keep a record of those projects for future reference. • CRI offered is 80+, and 90+ Note: on 90+ CRI use .85 multiplier • Tunable white, warm dim and other special LED colors available. 				<ul style="list-style-type: none"> • We design our own printed circuit boards to ensure high luminescence efficiency, low thermal resistance and long-term reliable operation. • Light engines are easily replaced. • We use only recognized brand LED's with 3 SDCM (standard deviation color matching) with high color consistency. 2 SDCM available upon request. • LRP - "LED Reel Program" – LED's for printed circuit boards come on reels' like old 8mm projectors and they're sold in lots just like fabric. At Picasso Lighting, we have a program where we make sure all of your reels come from the same lot for each project. This ensures excellent color consistency in large open spaces. • LED life is rated at 50,000 hours • Custom Lumens Available 	

Certifications & Warranties

- Limited five-year (50,000 hours) warranty on all products.
- I.C. rated fixtures are available upon request.
- Change orders may effect delivery schedule.
- All fixtures are IBEW manufactured and assembled.
- UL and CUL listed for dry and damp locations.
- DLC® is a non-profit organization whose mission is to drive efficient lighting by defining quality, facilitating thought leadership, and delivering tools and resources to the lighting market through open dialogue and collaboration. We are currently getting our products listed with DLC. Products listed, will have DLC Logo.
- Chicago Plenum products are available upon request.
- Made in the U.S.A.
